

# CONSTRUCTION UPDATE #2

COC - Aerial View

## Saskatoon Civic Operations Centre

### Current Activities

Piling is now complete. Over the next six weeks (until June 2015) pile caps (thick concrete mats that rest on the piles) and grade beams (reinforced concrete beams) will be installed in the administration building.

Over the summer months, the following "construction works" will be taking place:

- Excavation of the snow melt pit;
- Construction of the berm;
- Erection of structural steel (started);
- Installation of the exterior siding to the administration facility; and
- Building temporary roads on site (started).

Work has started on integrating the sewer system into the site and tying it back to the City. This will be coming in from the north access parallel to the railway, off Dundonald Avenue, and will not affect the operation or functionality of the system or its users

### Open House

Please join us to learn more about the COC and to share your thoughts on the project and happenings on site.

When: June 4, 2015  
Time: 4:00 pm - 7:00 pm  
Where: CN Curling Club (1602 Chappell Dr)

### About the Project

The Civic Operations Centre will co-locate the new Saskatoon Transit Operations Facility and the City's first Snow Management Facility. The new site located in Saskatoon's southwest quadrant, will provide direct access to Circle Drive South Bridge which will allow the City to move equipment, materials and vehicles more efficiently around the city.

The Transit Operations Facility will have room to store 224 City buses inside with capacity for future fleet growth. Among the features will be administrative offices, fare collection, fueling, wash lanes, maintenance bays and inspections pits. The Snow Management Facility will have the capacity to store up to 1 million cubic metres of snow and will feature a meltwater collection site where the environmental safety of meltwater can be monitored prior to release into the storm sewer system.

A berm will be constructed between the CN Railway and the Montgomery Place neighbourhood. Traffic signal lights will be installed at the intersection of Valley Road and Landfill Road to ensure safe and efficient traffic flows.
